

Measurable Growth. Real Literacy Progress.

At Halifax Learning, we're proud to share the impact of our work. We share the measurable gains that reflect the hard work of our students and the power of our structured literacy program. The charts below show how students grow over time, from their first days with us to five and ten months into their learning journey. You'll see average progress in the core areas that matter most for strong readers.

Word Decoding

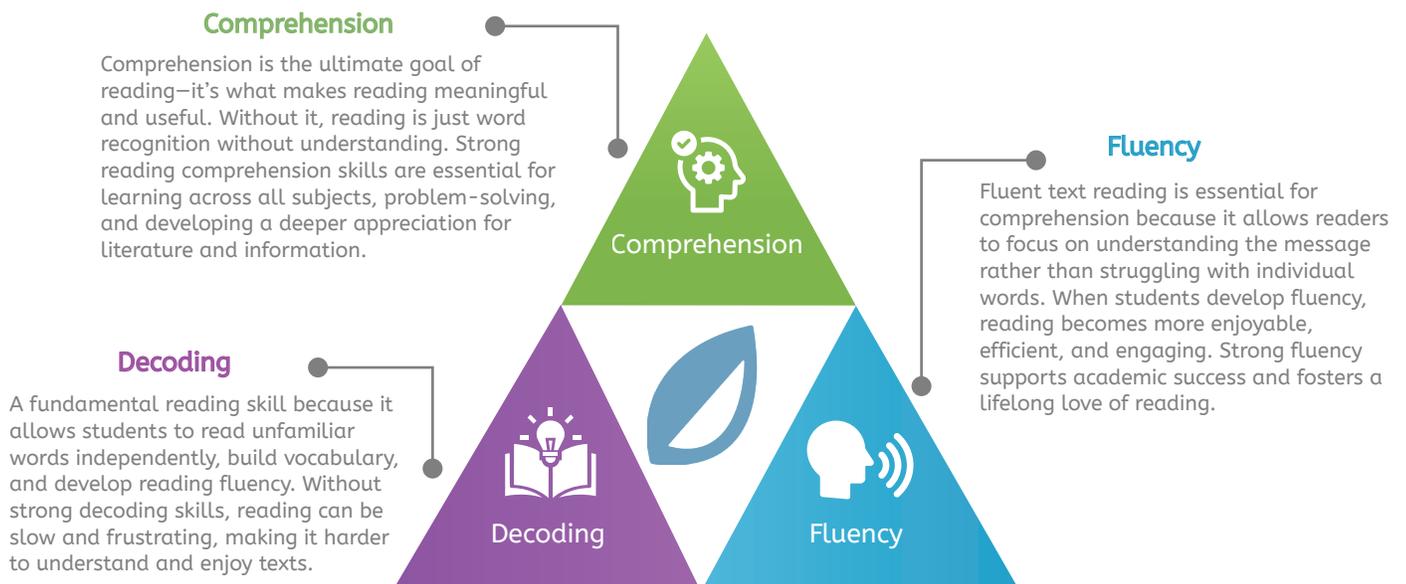

Word decoding is the ability to apply knowledge of letter-sound relationships to read words accurately and fluently. It involves breaking down words into their individual sounds (phonemes) and blending them to form recognizable words.

Reading Fluency

Text reading fluency is the ability to read connected text accurately, at an appropriate speed, and with natural expression. It goes beyond just recognizing words—it includes reading smoothly, grouping words into meaningful phrases, and using intonation that reflects the meaning of the text.

Reading Comprehension

Reading comprehension is the ability to understand, interpret, and engage with a text. It involves making sense of words, sentences, and ideas while drawing connections to prior knowledge and thinking critically about what is being read. Strong comprehension skills allow readers to extract meaning, make inferences, and analyze information effectively.

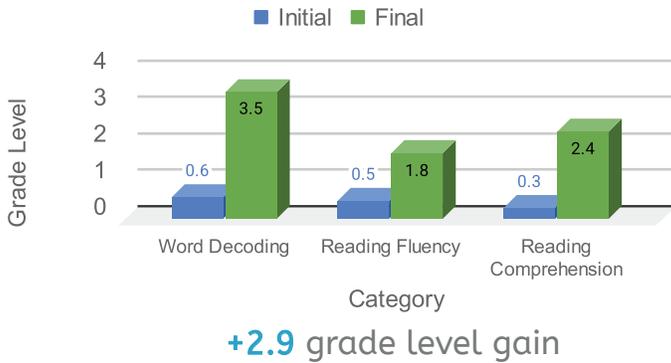

Strong literacy development requires integrating three essential skills: decoding, fluency, and comprehension. Halifax Learning programs strengthen each skill so students build confident, independent reading ability.

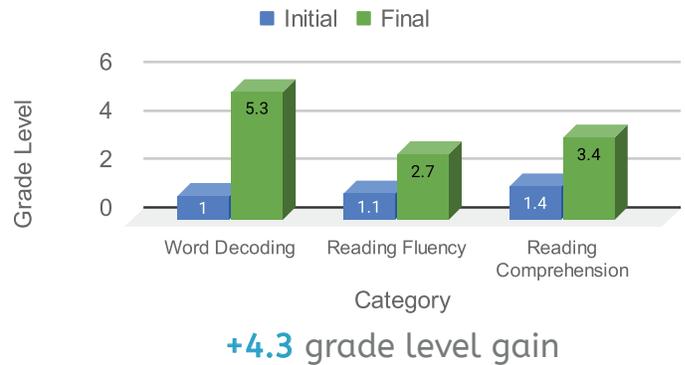

Student Growth Across Grades

Average growth across decoding, fluency, and comprehension with Halifax Learning programs.

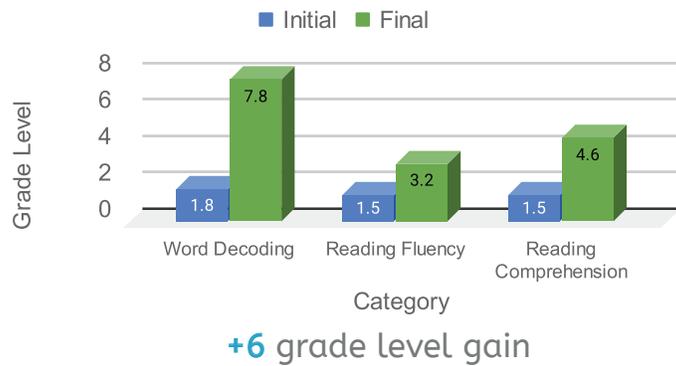

Grade 1: 420 Students

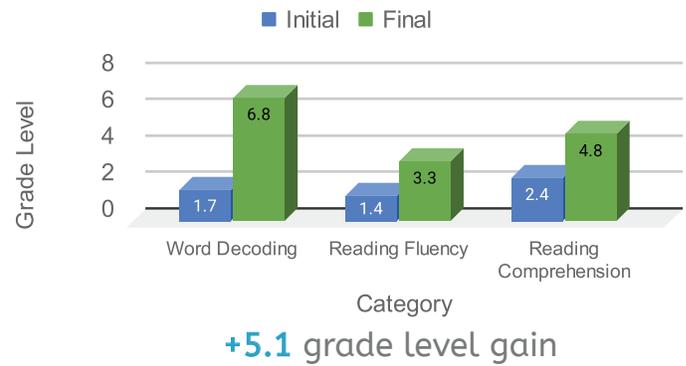

Grade 2: 567 Students

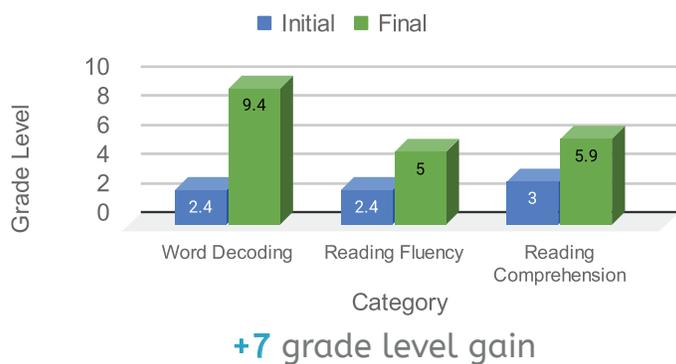

Grade 3: 571 Students

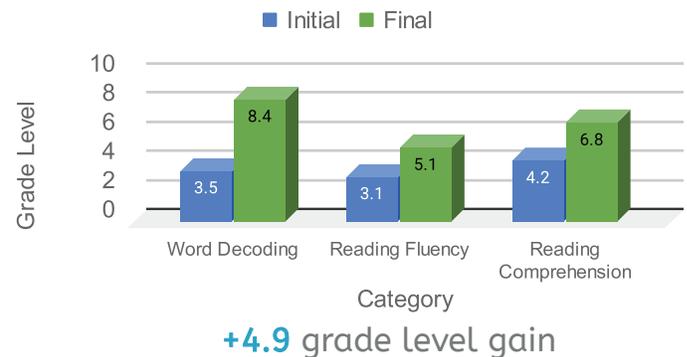

Grade 4: 369 Students

Grade 5: 312 Students

Grade 6: 225 Students

Students gain an average of 3–7 grade levels in key literacy skills.

From word decoding to reading comprehension, students consistently advance with our structured literacy program.
